

# **AUTOMATIC DRY INOCULATOR/SEED TREATER**

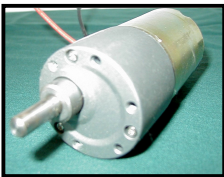

*"HANDS-FREE"  
Dry Seed  
Treatment!*

**Bulk Seed Handling  
Doesn't have to be extra work!**

Bulk seed handling has greatly increased and planting time is more valuable now than ever before. While increased yields are available with seed treatment, growers will not always take the additional time to treat the seed. The *AUTOMATIC* seed treaters by Enviropac, with *HANDS FREE* operation, match this system to the new bulk handling methods. The seed treater accurately meters the amount of seed treatment and dispenses it onto the seed. The seed & treatment is mixed as the product moves through the system.

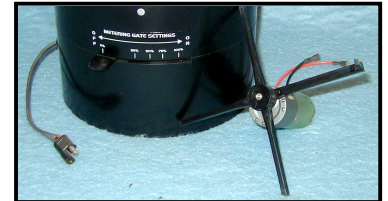

## **Motor & Gearbox**

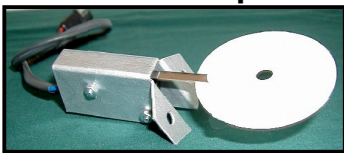

The treater is driven by a low RPM, high torque gearbox & 12volt motor. Easy seed cart field mount with the universal mounting bracket. Mounts directly to the cart for direct application onto the seed.

## **Specialized Metering System**

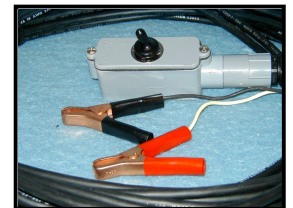

The metering gate & special designed blade adjusts the flow rate for varied products & application rates. Also, the blade design helps eliminate product bridging.

## **Hands-Free Operation**

takes place with the automatic on/off switch mounted in the discharge of the conveyor – when the conveyor runs – the seed treater runs! Shuts off when the conveyor is off. Convenient 3-way switch is provided at the operator platform. Connects to battery power with 50' of wiring. Harness has weather tight plugs. Direct-wired models available.

## **DRY SEED TREATER OPERATION**

Mounts directly to bulk wagons. Adjustable gate meters the product rate & blade dispense product at a consistent rate to match the conveyor capacity. 1¼" discharge hose places product directly onto the seed moving under the hose. The conveyor mixes the treatment & seed as it moves through the conveyor & discharge spout.

**Automatic System provides uniform coverage, one man, hands free operation!**

## **SPECIFICATIONS**

- **Automatic & Direct Models** – Complete with 50' wiring, automatic switch & weather tight plugs. Direct Model wires direct to 12Volt power on drill fillers, air system etc.
- **Units Include-** Motor & Gearbox, Mounting Bracket, Storage Container, Dispensing Blade & Metering Gate.
- **Treater Capacity** – Holds up to 160 oz.
- **Metering Rate** – Rate will match most portable systems & will vary depending on product being dispensed. Contact factory for your application requirements.
- **Products Dispensed** - Most dry inoculants & seed treatments. Review [product specifications](#) pages.
